

DESCRIPTION

ATOLLA WRP is a blackish, extremely tacky grease designed specifically for marine wire rope applications. The grease is made from high viscosity base oil fortified with anti-rust, anti-corrosion, selected graphite and molybdenumdisulphide additives. It provides excellent anti-wear and anti-rust protection, providing good adhesiveness and penetrating properties. This grease contains no solvent.

FEATURES AND BENEFITS

- Extreme wire rope protection from salt water corrosion
- Superior water resistance in severe wet operations
- Excellent wear protection under extreme heavy duty operating conditions
- Excellent adhesiveness

APPLICATION

ATOLLA WRP is recommended for use on marine wire ropes, open gears, manual lubricating chains, conveyors and general grease points on deck equipment.

TYPICAL SPECIFICATION

Color	Black
Density	~0.95
Four Ball EP, Last Nonseizure Load, N	1118
